Election/Restrictions

1. Applicant's election of Species V, figure 6 in the reply filed on 9/3/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). It is noted that applicant stated that the election was with traverse, but no traverse accompanied the response.
2. Claims 2-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/3/04.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 8-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Niikura (6029377).

Niikura shows a shoe sole (especially figure 12) with a resilient material layer (4), a less resilient layer (6), studs (10) with tips (small end portions shown in figure 12) and anchor (at 26), and a recess (12) as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3728

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Dufour (2424226) or Jankauskas (3747238) in view of Kastner (5643283).

Dufour or Jankauskas shows a shoe sole formed from resilient materials (28 or 14) with studs (30 and 31 or 20) embedded therein with a recess (shown in figures 8-10 or figures 1, 3, and 5) substantially as claimed except for having the tips of the studs extending beyond the bottom surface of the sole. Kastner teaches extending a tip portion of a stud beyond the bottom surface of the sole. It would have been obvious to extend the tips as taught by Kastner in the shoe of either Dufour or Jankauskas to increase traction on softer surfaces.
